

CAPABILITY STATEMENT

EXECUTIVE SUMMARY

With a legacy spanning over 3 decades, IKIO stands as a leader in the lighting industry. We take pride in being an MBE and a Leading Lighting Manufacturer in the US, equipped with world-class infrastructure, a team of qualified engineers and lighting experts, and a vast network of robust partnerships.

We are a reliable self-manufacturer, providing the exact lighting solutions you need. Each product is made from quality-sourced components and fine-tuned to your specifications. From pre-project planning to ongoing support to post-project assistance, IKIO takes care of it all, ensuring the smooth completion of your project!

THE IKIO ADVANTAGE

As Your Direct Lighting Partner, We Offer:

- Custom Quotations to Meet Your Unique Project Needs.
- Manufacturer-direct Benefits, Meaning Access to Best Pricing & Assured Quality.
- Swift Delivery of Products with a Rotating Inventory & Ready-to-Ship Stock.
- Tailored Warranties on Projects for Up to 20 Years.
- Dedicated Project Personnel, Providing Real-time Updates Around-the-Clock.
- Financial Flexibility in Projects to Ensure Your Peace of Mind.

CORE COMPETENCIES

With unwavering dedication to innovation and successful integration of new ideas, we have consistently honed our processes over the years to deliver cutting-edge solutions.

Manufacturing Excellence

- Annual manufacturing capacity of over 10 million fixtures.
- 7 vertically integrated manufacturing plants with a combined area of over 500,000 sq ft.
- Lean systems implementation to develop comprehensive energy saving solutions.
- Continuous focus on R&D to produce fixtures that are innovative and customer specific.
- Sustainable manufacturing practices to help reduce global energy consumption.

Quality Assurance

- Exceptional in-process success rate of over 99.32%.
- All major quality certifications, including ISO 9001 & 14000, OHSAS 18001, UL 1598 & 844, and DLC.
- Stringent and no-compromise quality testing and analysis using spectrometer, thermal chambers, LCR meter, isolation tester, etc.

Advanced Technology & Infrastructure

In-house production units with advanced technology, such as:

- Product design studio.
- Prototype design & fabrication facility.
- Injection molding facility.
- State-of-the-art testing equipment.
- SMT & MI assembly lines.
- Fully automated powder coating facility.
- Ultra-modern toolroom facility.
- Auto insertion systems.
- In-house facility for research & development.

KEY DIFFERENTIATORS

- Self-manufacturer Offering Customized, Easy-to-Install, and High-Efficacy Lights for All Industries.
- Strategically Located Distribution Centers Across the US, Ensuring Broad Reach.
- Stock Availability with Quick-ship Inventory (1000+ Rebate-eligible SKUs).
- End-to-End Project Solutions (Prototyping, Installation, Post-project Support).
- Preliminary Energy and Lighting Audits to Help You Maximize Efficiency.
- Precise Lighting Layouts, Delivered within 24-48 Hours.
- Comprehensive Spec Sheets with Detailed Specifications to Inform You Better.
- BAA & BABA Compliant Lights for Federal and Other Lighting Projects.
